Dr. Loukia Prentza is a Mechanical Engineer holding a PhD related to CO₂ absorption systems. She studied Mechanical Engineer at National Technical University of Athens, specialized in the energy field. During 2012-2013 worked for CERTH/HIT as a research associate, and has been involved in NOBEL (www.ict-nobel.eu, STREP) and Cloud4all (cloud4all.info, IP) European projects and in the preparation of various proposals, related mainly with energy and smartcities. Since 2020, she is working as a research associate in European projects at the Laboratory for Floating Structures and Mooring Systems (LFSMS) of the School of Naval Architecture and Marine Engineering (NTUA).
